## Trail guide

### TRAIL TOPOGRAPHY:

### TRAIL DESCRIPTION:

Visitor can begin their hike on the Pytkyn Pyrähdys trail from one of two locations: the parking area at Kellarilampi Pond or the parking area at Lauttalampi Pond. The trail is marked with yellow signs and also includes signposts that guide visitors from one rest stop to the next. We recommend reserving at least three hours for hiking the trail, including any lunch breaks. The greatest height difference along the 9-km route is 50 metres. During the autumn, we recommend taking a mushroom basket, as Pytkynharju is known for its bolete mushrooms.

### GOOD TO KNOW:

- tour/mountain biking is only allowed on roads and separately-marked biking routes along the trail.
- during forest fire warnings, making any open fires is expressly prohibited
- pets are welcome on the route and in the huts. Please remember to keep your animal friends leashed at all times.
- there are no waste receptacles at the rest stops, so please remember to "Leave No Trace"
- the dry toilets do not include any toilet paper
