# Kieverrysjärvet

The Kieverrysjärvet area consists of lakes bordered by esker ridges and dry heath. It is a wilderness area of considerable scenic beauty on the Russian border.

The state border passed through the area during the time of the 1617 Stolbova peace treaty. The present border has remained unchanged here for over four hundred years.

The 5 km footpath circles the lakes and leads through pine-covered eskers and areas of dry heaths. The trail, winding through light shimmering lichen fields, is easy to walk. On the southern side of lake Juolunka the trail meets the frontier zone. Entering the zone is prohibited.

The lakes are ideal also for paddling. It is possible to make a circle trip by using the short canoe portage between lakes Porojärvi and Syvälampi.

### In Kieverrysjärvet, the following are allowed

- walking, canoeing, boating
- Note! Entering the frontier zone requires a permission from the Border Guard. The zone is clearly marked on the maps and in the area.
- picking berries and edible mushrooms
- camping at the campfire sites
- fishing and hunting according to the legislation

### forbidden

- lighting campfires if a forest fire warning is in effect
- littering and damaging constructions
- disturbing and harming the environment and animals
- driving motor vehicles on land areas outside marked roads and routes
